INTRODUCTION

Thank you for your interest! Below is a overview of the services and skills I offer.

Design Skills

- Over 16 years in Marketing and Advertising.
- I work in both Adobe Software and Corel Draw.

Development Skills

- 20 Years designing & developing web sites
- Responsive HTML5/CSS, PHP/MySQL, Javascript.
- Platforms: HTML, Wordpress, Concrete5, Miva, Shopify. And I can quickly adapt to any other platform.

Experience

- Branding & Identity Development
- Logo, Business Cards & Stationery
- Marketing & Sales Materials
- eMarketing, Digital Ads & Social Media
- Brochures, Flyers & Print Ads
- Product & Package Designing
- Trade Show Graphics
- Website Designing & Development
- Product/Promotional Videos

Production Full production studio with CNC, laser, vinyl and dye-sublimation services for custom displays, signage, giveaways & personalized art & gifts.

Disclaimer: Any of my body of works labeled **WFH/CA** were produced by me as an employee with ColorAmerica, Inc. located in Largo, Florida. All copyrights remain with ColorAmerica, Inc. and their respective clients. I post this disclaimer out of respect to the company and owners as I am grateful for the 15+ years I have been in service with ColorAmerica, and the years yet to come.

before **YOU** buy
Things you should know

Is the sump you are installing (or have installed) CPSC/VGB Listed as APPROVED?

- To verify your sump is registered and meets all requirements, visit poolsafety.gov/draincman.html.
- If your sump is not listed on the CPSC website, it MUST be inspected and certified by a Registered Design Professional who will deem if the sump complies with VGB laws and regulations.
- Do not be confused by those that describe their products as VGB Compliant versus CPSC/VGB Listed. A VGB Compliant sump must be inspected and certified by a Registered Design Professional. Only CPSC/VGB Listed sumps can be installed without certification.
- ALL Field-Fabricated main drain grates and sumps must be inspected by a Registered Design Professional based on VGB requirements.

Failure to comply to the VGB law could lead to heavy fines and pool closure, including unnecessary risk of future liability.

Still confused and have questions? Our technical support team is ready to answer your call. 1.800.897.6160

THE FIRST NSF-50 GRATING

Why Architects & Designers Love Lawson Aquatics®

When Architects and Designers demand the very best for their project, Lawson Aquatics delivers — and delivers. Lawson Aquatics is extremely proud to announce that it is the first and only *rig* flow system manufacturer to receive NSF/ANSI Standard 52 Certification (NSF 52) for its line of PVC grating for swimming pools, spas, hot tubs and other recreational water facilities. The NSF/ANSI Standard 52 is world-renowned as the American National Standard for products that exhibit and meet the highest standard for material safety, design and construction, and product performance. At Lawson Aquatics, we exceed NSF-52 Certification not only meets the demands of quality for our clients, but also an even greater need — the peace of mind.

Available in 1.5" x 2" Size

Additional Features

- Increased coefficient of friction to 0.8 ASTM — complies with ADA.
- Tested for color fastness and UV stability (ASTM D-194, exceeding 750 hours).
- Tested for (ASTM E-461) load-to-failure and deflection at 200 pounds.
- Available in three standard colors.

NSF-50.

Attractions Expo 2012

2012

Join Us!
Booth #4452

November 13th - 16th
Orange County Convention Center
Orlando, Florida

We're Proud to Unveil our Biggest New Idea in Small Pool Filtration

[firstname]

We know that even our largest customers can have smaller systems included in their parks and facilities. Now we're more ready than ever to tackle both ends of the flow spectrum.

Come by our booth at this year's IAAPA Attractions Expo and let us show you what we've developed to serve your "small system" needs. Our latest invention is ideal for splash pads, hotel pools, spas and more!

- **Small** – Fits through a standard doorway
- **Simple** – Easy to operate
- **Safe** – Filters down to 1 micron
- **Savings!** – Cost-effective for flow rates from 56 to 411 gpm

Click Here to schedule a personal showing at IAAPA

CONGRATULATIONS to Yas Waterworld!

From the beginning, Yas Island's operations team knew that Neptune-Benson's Defender filter was a perfect fit for Yas Waterworld Aqua Park. The team's leadership had previous experience with Defender's eye-opening results and understood that there was no better filter to achieve the goals set out for this world-leading water park.

Neptune Benson is proud to have been an instrumental part of one of the most ambitious and largest water park projects to date. Through combined efforts the project has resulted in creating industry innovation and leadership.

Defender
by Neptune-Benson

True Story:

Defender will save more than \$6 million USD in operating expenses over the next 10 years, cumulative savings will provide a payback of less than 2 years.

SEI : SECOND TO NONE

All SEI drives and parts are 100% OE compatible, and its reputation for state-of-the-art manufacturing combined with the most comprehensive quality control system and rigorous testing allows SEI to provide dealers and end users with the best warranty in the industry. It's this commitment to quality and to customers that makes SEI second to none.

COMMITTED TO QUALITY

COMMITTED TO YOU

COMPLETE STERNDRIVES starting at \$1295

3-YEAR WARRANTY

CASES
Our cases are CNC machined using a single fixture set up, providing precise alignment of all bores and other critical dimensions. All cases are chrome dipped and powder-coat painted, resulting in durable and corrosion resistant finish.

U-JOINTS
SEI uses heavy-duty, greasable U-joints.

OIL SEAL & GASKETS
SEI Marine Products has designed & sourced its own high performance line of these products.

LOWER GEARS
Our spiral bevel gears are cut on Gleason machines. The forward and pinion gears are made from a higher grade alloy to provide for extended life.

BEARING CARRIER
SEI Marine Products bearing carriers are made of die cast, anodized aluminum.

UPPER GEARS
Our spiral bevel gears are cut on Gleason machines. The forward and pinion gears are made from a higher grade alloy to provide for extended life.

WATER PUMP ASSEMBLY
Our water pump impellers are made of high quality, long lasting neoprene rubber.

SHAFTS
SEI prop & drive shafts are friction welded bimetal. The gear box end of the shaft is comprised of hardened alloy 5020, while the shafted exposed to the elements is 17-4PH stainless steel.

Technology has changed how business communication is conducted—and effective communication is a necessity for any business.

To thrive in today's economy, you have to collaborate with colleagues, partners, and customers around the globe at a moment's notice. At the same time, you want to conduct business in a way that enhances the quality of your relationships.

Hartman Integration, an innovative leader in video conferencing, collaboration and audio/visual, makes meeting over distance just as productive as being there.

Hartman Integration enables rapid and collaborative decision making. We shorten chains of communication over distance and we continuously enable innovative products and services. Hartman solutions have become critical to companies and organizations trying to win in today's increasingly competitive world.

WHY CHOOSE HARTMAN INTEGRATION?

Since each business environment is unique, Hartman Integration designs a range of solutions from audio/visual (A/V) integration, including high definition video conferencing, to touch-control systems. We build systems that are easy to use and allow our customers to focus on their business without being distracted by the technology.

A/V communication and video conferencing technology is a simple and effective way to make a powerful impression. Regardless of whether you are delivering your ideas across the room or across the country, your message and the means in which it is delivered should inspire and captivate.

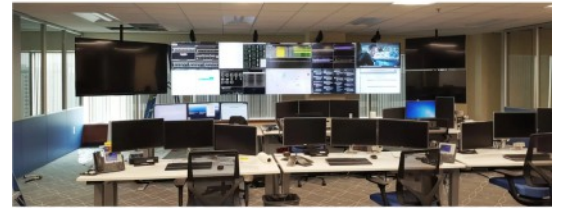

CUTTING-EDGE TECHNOLOGY

Make an impression on your audience or associates with professional audio, video & control systems solutions. Technology has changed how business communication is conducted and effective communication is a necessity for any business. Hartman Integration provides comprehensive solutions for today's business demands. Since each business environment is unique, we custom-design a range of solutions from audio/visual integrations to touch-control systems. We provide integrated solutions for any environment – boardrooms, meeting rooms, training centers and auditoriums. Our goal is to provide the essential elements to make your vision a reality. Our solutions are scalable to meet your current and future business objectives.

CHANGING THE WAY WE COMMUNICATE

Technology has changed how business communication is conducted—and effective communication is a necessity for any business.

To thrive in today's economy, you have to collaborate with colleagues, partners, and customers around the globe at a moment's notice. At the same time, you want to conduct business in a way that enhances the quality of your relationships.

Hartman Integration, an innovative leader in video conferencing, collaboration and audio/visual, makes meeting over distance just as productive as being there.

Hartman Integration enables rapid and collaborative decision making. We shorten chains of communication over distance and we continuously enable innovative products and services. Hartman solutions have become critical to companies and organizations trying to win in today's increasingly competitive world.

Since each business environment is unique, Hartman Integration designs a range of solutions from audio/visual (A/V) integration, including high definition video conferencing, to touch-control systems. We build systems that are easy to use and allow our customers to focus on their business without being distracted by the technology.

A/V communication and video conferencing technology is a simple and effective way to make a powerful impression. Regardless of whether you are delivering your ideas across the room or across the country, your message and the means in which it is delivered should inspire and captivate.

You research and compare your biggest purchases
But not healthcare... Until now.

When purchasing a car you research CarFax®, for appliances you look to Consumer Reports® ... but how do you know you are getting the best healthcare possible at the most affordable price?

The answer is the Medical Advocate Program® (MAP)®.

Your employer, **Precision Fabric Group** has chosen MAP® to help you with reducing your healthcare and medical costs. In addition, MAP will assist you to get more out of your health care benefits and become a more knowledgeable purchaser of healthcare.

MAP® employs Nurse Advocates to guide and coach you through your episode of care— directing you to the highest qualified physicians and the most effective facilities through a simple phone call. And the best part, **MAP® is FREE** to use, for you and your family members!

Call MAP® FIRST for any of the following:

- To get a primary care physician
- If you need a specialist or a second opinion
- If you are planning to have surgery
- If you need diagnostic tests such as X-rays, MRI, CT Scan, PET Scan
- To get help with questions to ask your provider

All information discussed with your MAP® Nurse Advocate is strictly confidential and this service is totally independent to ensure your privacy.

The **ONLY** American Pool Grating Company that follows **IBC STANDARDS**

[LEARN MORE](#)

STRENGTH & DURABILITY

Daldorado, with Rob Lawson as the founder, brings over 75 years of combined innovative experience to the commercial pool grating fabrication industry that meets or exceeds the highest of International and US standards. In fact, Daldorado is the only American pool grating company that follows International Building Code (IBC) standards.

Committed to continuously anticipating and leading the charge of the new gold standard, Daldorado delivers the grating and deck drain systems that leading commercial pool designers, aquatic consultants and contractors have come to expect from a Daldorado product.

USA: 4327 Arnold Ave, Naples, FL 34104 • Ph: +1 888 509 8128 | Australia: 5097 Humphreys Rd, Frankston South, VIC 3199 • Ph: +61 410 108 188

GRATING WORTH ITS WEIGHT IN GOLD.

The new IBC standards for pool grating demands quality, performance and safety—standards necessary to help protect everyone from the potential risks that may be found in inferior rim-flow, deck-drain and main-frame systems. So, how do you know if grating meets these new standards?

Enter Daldorado. Through advanced engineering techniques combined with extensive R&D, and using only the highest quality materials, Daldorado not only meets, but exceeds IBC standards and requirements. Tested and proven by an independent laboratory, the results have been nothing short of amazing. We invite you to view our testing in action and read the results for yourself—and then call Daldorado to learn more about the new gold standard in pool grating!

IBC's New Load Requirements (Classification AS 3996 Class A)

- Load in excess of over 2,000lbs (10kN) for grates and covers
- Standard for strength covering access covers and grates ANS/APSP AS 3996

DELIVERING AMAZING PRODUCTS AND OUTSTANDING CUSTOMER SERVICE IS MORE THAN A MINDSET...

...IT'S IN OUR GENES.

At Daldorado, we live and breathe commercial pool grating—it's virtually in our genes. Our years of experience in the aquatics industry combined with a steadfast determination to be the best has afforded us the ability to design and manufacture the highest-quality, PVC commercial pool grating available on the market today.

For aquatic designers, Daldorado's full line of drains and grates offer peace of mind. Every Daldorado product is engineered, tested and certified to meet or exceed strict IBC standards to help mitigate liability and, more importantly, save lives.

For commercial pool contractors, Daldorado's revolutionary parallel grating system is specifically designed to reduce installation time by 75% resulting in significant labor cost savings.

Add to this, our outstanding customer service, which is second to none. Whatever our customers need, we're ready and eager to help.

Let us show you why Daldorado is known as the gold standard for grating. Contact us today for three product samples or invite us to quote.

Features

DalLUX™ Support Grate
DalLUX Support Grates for use with straight perimeter pool gutters, new construction or retrofit. Two-inch (2") wide supports and custom miter corners are engineered for high-load capacity. DalLUX™ support grates are available in two water drop-in options:
4 openings (3 parallel sections of tile or stone)
5 openings (4 parallel sections of tile or stone)

Use with Stone or Tile™
High load capacity to minimize deflection of stone or tile (+/- 5,000 lbs/2,268kg)
Water drop-in openings (notches) ensure the 5mm (0.31") gap to meet IBC Child Finger/Toe Entrapment Guidelines.
Load capacity suitable for normal pedestrian traffic.

Adhesive/Sealant
Beads of special adhesive/sealant (supplied) are applied to individual grate supports by a professional stone/tile installer. Use traditional thrust or mastic for the deck as instructed by stone/tile manufacturers.

NSF **MADE IN USA**

THE CHAMPION in COMPLIANCE and SAFETY

DALDORADO IS FIRST AGAIN!

At Daldorado, we understand the importance of COMPLIANCE AND SAFETY.

That's why we're proud to announce that we are the only grating company that **TESTS AND CERTIFIES ALL OF OUR PRODUCTS TO ANSIS/CFR-50 2020 sec.22.3 for UV ASTM G154, Vertical Load and Deformation, Pull Load, and Finger and Limb entrapment** — as per section 3 of APSP-16 (5). Our commitment to excellence ensures peace of mind knowing a commercial pool or aquatic facility is designed with the highest level of compliance and safety.

But we don't stop there. Perpendicular grates are limited in their use due to large gaps forming between grates when installed on a radius. These large gaps can become a serious concern for entrapment. With Daldorado's parallel grating, the gap opening is maintained for ANY and ALL radii and certified compliant. You can trust our products to not only meet safety requirements, but also maintain the aesthetics of your design.

NO OTHER GRATING COMPANY CAN MAKE THIS CLAIM.

NSF Certified to ANSIS/CFR-50 2020

Having dependable radio coverage is not only critical for first responders in emergency situations, but is now required by law.

Florida mandate now requires specific types of buildings, such as high-rise commercial and residential apartments to install a BDA system in buildings that have "dead zones" for public safety radio signals.

To ensure compliance with the new codes, an extension for the new regulations has been given and all buildings must be verified and made compliant by January 1st, 2025.

Structures Included:

- Office buildings
- Parking structures and storage unit facilities
- Hotels and hospitality venues
- High-rises
- Malls and retail centers
- Campuses
- Stadiums and arenas
- Airports, train stations, and other transit centers

Process to compliance

Inspection

Southeast System Solutions (a FCC GROL licensed company) will conduct a RF survey of your building. After the completion of the survey, the results are submitted to the AHJ for a final determination of whether a Full System, Partial System, or Waiver will be required.

Proof of Permit

Deadline: January 1st, 2024

Permit pull base on results of survey. Additionally, the building owner must provide evidence that the structure will comply with the said requirements by January 1st, 2025.

Full Compliance

Deadline: January 1st, 2025

For more in-depth information please contact is at 813.743.8955 or click below to schedule your BDA Compliance Inspection.
